

Tork Advanced ručníky Interfold (bílá)

Položka: 120289

Systém: H2 - Systém skládaných ručníků

Vrstvy: 2

Barva: Bílá

Rozložená šířka: 21.2 cm

Rozložená délka: 25.5 cm

Složená šířka: 21.2 cm

Složená délka: 8.5 cm

Potisk: NE

Vytlačený vzor: ANO

Popis

Dvouvrstvé skládané ručníky Interfold velmi dobré kvality z ady Soft s elegantní ražbou šedých vavínových lístků. Rychlé a efektivní vysušení rukou.

Vlastnosti produktu

Údaje o dodání

Spotřebitelská jednotka:

EAN: 7322540159936

Kusy: 180

Materiál: Banderole

Výška: 130 mm

Šířka: 85 mm

Délka: 212 mm

Objem: 2.3 dm³

Čistá hmotnost: 350 g

Hrubá hmotnost: 356 g

Přepravní jednotka:

EAN: 7322540159943

Kusy: 3780

Spotřebitelské balení: 21

Materiál: Plastic

Výška: 212 mm

Šířka: 390 mm

Délka: 595 mm

Objem: 49.2 dm³

Čistá hmotnost: 7.36 kg

Hrubá hmotnost: 7.58 kg

Ekologické informace

Content

The fibre composition in the product is virgin and recycled

Material

Virgin fibres and recovered paper

In the tissue process both virgin fibres and recovered paper are being used. In the process it is a matter of finding an efficient solution where both virgin fibres and recovered paper play a role. Different fibres demand different processes and this determines the end product properties, and makes the fibre type (recovered or virgin) less important. The environmental benefits and economic feasibility of recovered paper as a raw material source depend on its availability, transport distance and the quality of the collected material.

Bleaching of fibres

Bleaching is a cleaning process of the fibres and the aim is to achieve a bright pulp, but also to get a certain purity of the fibre in order to achieve the demands for hygiene products and in some cases to meet the requirements for food safety. There are different methods used today for bleaching ECF (elementary chlorine free) where chlorine dioxide is used, and TCF (totally chlorine free) where ozone, oxygen and hydrogen peroxide is used.

Chemicals

The chemicals used in the process as well as the functional chemicals are assessed from an environmental, occupational health and safety and product safety point of view. The used functional chemicals are: Wetstrength agent Dry strength agent If coloured = Dye Fixing agents Fluorescent whitening agent Glue = if used The process chemicals are: Antipitch Protection agent Yankee coating Defoamer Dispersing agents and surfactants pH and charge control Retention aids Broke treatment chemicals Drainage aid Packaging Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes Fulfilment of essential requirements: Yes Environmental label This product is approved for Nordic ecolabel and EU ecolabel.

Date of issue 2007-03-08

Revision date 2009-07-23

Production

This product is produced at Kostheim mill, Germany. Kostheim mill is certified according to ISO 14001 and EMAS.

Destruction

This product is mainly used for personal hygiene and can be collected together with household waste. The packaging can be used for material recovery or energy recovery
