

# Tork Advanced papírové ručníky C (bílá)

**Položka:** 290264

**Systém:** H3 - Systém se skládáním C a ZZ

**Vrstvy:** 2

**Barva:** Bílá

**Rozložená šířka:** 24.8 cm

**Rozložená délka:** 31 cm

**Složená šířka:** 24.8 cm

**Složená délka:** 10 cm

**Potisk:** NE

**Vytlačený vzor:** ANO

## Popis

Dvouvrstvé skládané ručníky C základní kvality, úsporné řešení pro všechny typy toalet.

## Vlastnosti produktu

## Údaje o dodání

**Spotřebitelská jednotka:**

**EAN:** 7322540176957

**Kusy:** 120

**Materiál:** Banderole

**Výška:** 100 mm

**Šířka:** 100 mm

**Délka:** 248 mm

**Objem:** 2.5 dm<sup>3</sup>

**Čistá hmotnost:** 382 g

**Hrubá hmotnost:** 389 g

**Přepravní jednotka:**

**EAN:** 7322540177008

**Kusy:** 2400

**Spotřebitelské balení:** 20

**Materiál:** Carton

**Výška:** 262 mm

**Šířka:** 401 mm

**Délka:** 596 mm

**Objem:** 62.6 dm<sup>3</sup>

**Čistá hmotnost:** 7.64 kg

**Hrubá hmotnost:** 8.32 kg

## Ekologické informace

### Content

Recycled fibres, Chemicals

### Material

Recycled fibres Recovered paper can be produced both from collected newsprint, magazines and office waste. The paper is washed with water and treated with chemicals under high temperature and then filtered. Different fibres demand different processes and this determines the end product properties, and makes the fibre type (recovered or virgin) less important. The environmental benefits and economic feasibility of recovered paper as a raw material source depend on its availability, transport distance and the quality of the collected material. Bleaching of fibres Bleaching is a cleaning process of the fibres and the aim is to achieve a bright pulp, but also

to get a certain purity of the fibre in order to achieve the demands for hygiene products and in some cases to meet the requirements for food safety. There are different methods used today for bleaching ECF (elementary chlorine free) (where chlorine dioxide is used), and TCF (totally chlorine free) where ozone, oxygen and hydrogen peroxide is used.

#### Chemicals

The chemicals used in the process as well as the functional chemicals are assessed from an environmental, occupational health and safety and product safety point of view. The used functional chemicals are: Wet strength agent, Dry strength agent, Dye = if coloured, Fixing agents, Fluorescent whitening agent, Glue = if used. The process chemicals are: Antipitch, Protection agent, Yankee coating, Defoamer, Dispersing agents and surfactants, pH and charge control, Retention aids, Broke treatment chemicals, Drainage aid.

#### Packaging

Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes. Environmental label = Ecolabel. This product does not have any ecolabel.

Date of issue 2007-11-06

Revision date 2009-07-23

#### Production

This product is produced at Kostheim mill, Germany, and certified according to ISO 9001:2000, ISO 14001 and EMAS.

#### Destruction

This product is mainly used for personal hygiene and can be collected together with household waste.
