

Tork Advanced utěrka 420 (modrá)

Položka: 128207

Systém: M2 - Systém se středovým odvíjením velký

Vrstvy: 2

Barva: Modrá

Potisk: NE

Vytlačený vzor:

Šířka role: 20 cm

Délka role: 1.575 m

Počet listů: 450

Délka listu: 35 cm

Průměr role: 19 cm

Popis

Dvouvrstvá papírová utěrka z ady 420 z kvalitního recyklu v roli se středovým odvíjením. Modrá barva - ideální pro použití v potravinářství a na místech s velkou spotřebou.

Vlastnosti produktu

Údaje o dodání

Spotřebitelská jednotka:

EAN: 7310791218106

Kusy: 1

Výška: 200 mm

Šířka: 190 mm

Délka: 190 mm

Objem: 7.2 dm³

Čistá hmotnost: 1323 g

Hrubá hmotnost: 1325 g

Přepravní jednotka:

EAN: 7310791218113

Kusy: 6

Spotřebitelské balení: 6

Materiál: Plastic

Výška: 200 mm

Šířka: 380 mm

Délka: 570 mm

Objem: 43.3 dm³

Čistá hmotnost: 7.94 kg

Hrubá hmotnost: 8.03 kg

Content

Recycled fibres, Chemicals

Material

Recycled fibres Recovered paper can be produced both from collected newsprint, magazines and office waste. The paper is washed with water and treated with chemicals under high temperature and then filtered. Different fibres demand different processes and this determines the end product properties, and makes the fibre type (recovered or virgin) less important. The environmental benefits and economic feasibility of recovered paper as a raw material source depend on its

availability, transport distance and the quality of the collected material. Bleaching of fibres Bleaching is a cleaning process of the fibres and the aim is to achieve a bright pulp, but also to get a certain purity of the fibre in order to achieve the demands for hygiene products and in some cases to meet the requirements for food safety. There are different methods used today for bleaching ECF (elementary chlorine free) (where chlorine dioxide is used), and TCF (totally chlorine free) where ozone, oxygen and hydrogen peroxide is used.

Chemicals

The chemicals used in the process as well as the functional chemicals are assessed from an environmental, occupational health and safety and product safety point of view. The used functional chemicals are: Wet strength agent Dry strength agent Dye Fixing agents Fluorescent whitening agent Glue Softeners The process chemicals are: Antipitch Protection agent Yankee coating Defoamer Dispersing agents and surfactants pH and charge control Retention aids Broke treatment chemicals Drainage aid

Product safety

The product fulfils the legislative requirements for food safety = Isega.

Packaging

Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes Environmental label = Ecolabel This product does not have any ecolabel. 10-02-23

Production

This product is produced in Skelmersdale Mill, GB, certified according to ISO 9001, ISO 14001.

Destruction

This product is mainly used for personal hygiene and can be collected together with household waste. If used for industrial processes check local regulations for destruction.
