

Tork Advanced papírové ručníky v roli (zelená)

Položka: 290076

Systém: H1 - Systém papírových ručníků v rolích

Vrstvy: 2

Barva: Zelená

Potisk: NE

Vytlačený vzor: ANO

Šířka role: 21 cm

Délka role: 150 m

Průměr role: 19 cm

Vnitřní průměr jádra: 3.8 cm

Popis

Dvouvrstvý ručník velmi dobré kvality. Vyroben z recyklovaného materiálu.

Vlastnosti produktu

Údaje o dodání

Spotřebitelská jednotka:

EAN: 7310791195476

Kusy: 1

Materiál: Banderole

Výška: 210 mm

Šířka: 190 mm

Délka: 190 mm

Objem: 7.6 dm³

Čistá hmotnost: 1512 g

Hrubá hmotnost: 1528 g

Přepravní jednotka:

EAN: 7310791195483

Kusy: 6

Spotřebitelské balení: 6

Materiál: Carton

Výška: 247 mm

Šířka: 388 mm

Délka: 588 mm

Objem: 56.4 dm³

Čistá hmotnost: 9.07 kg

Hrubá hmotnost: 9.82 kg

Recycled fibres, Chemicals

Material

Recycled fibres Recovered paper can be produced both from collected newsprint, magazines and office waste. The paper is washed with water and treated with chemicals under high temperature and then filtered. Different fibres demand different processes and this determines the end product properties, and makes the fibre type (recovered or virgin) less important. The environmental benefits and economic feasibility of recovered paper as a raw material source depend on its availability, transport distance and the quality of the collected material. Bleaching of fibres Bleaching is a cleaning process of the fibres and the aim is to achieve a bright pulp, but also

to get a certain purity of the fibre in order to achieve the demands for hygiene products and in some cases to meet the requirements for food safety. There are different methods used today for bleaching ECF (elementary chlorine free) (where chlorine dioxide is used), and TCF (totally chlorine free) where ozone, oxygen and hydrogen peroxide is used.

Chemicals

The chemicals used in the process as well as the functional chemicals are assessed from an environmental, occupational health and safety and product safety point of view. The used functional chemicals are: Wet strength agent, Dry strength agent, Dye (if coloured), Fixing agents, Fluorescent whitening agent, Glue (if used). The process chemicals are: Antipitch Protection agent, Yankee coating, Defoamer, Dispersing agents and surfactants, pH and charge control, Retention aids, Broke treatment chemicals, Drainage aid.

Packaging

Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes. Environmental label = Ecolabel. This product is approved for Blue Angel and Nordic Swan.

Date of issue 2007-11-06

Revision date 2009-07-23

Production

This product is produced at Kostheim mill, Germany, and certified according to ISO 9001:2000, ISO 14001 and EMAS.

Destruction

This product is mainly used for personal hygiene and can be collected together with household waste.
